

Tapmatic International Corporation, Kriessern, Switzerland Celebrates 25th Anniversary

Tapmatic agents from across Europe gathered in Zurich and Kriessern Switzerland October 16th and 17th 2006 to celebrate the 25th Anniversary of the opening of Tapmatic's European manufacturing, sales and service center.

The 2 day event was opened with a welcome in Zurich from Mr. Peter Brandenberger owner of Swiss Machinery Import Company and a partner in Tapmatic International Corporation. Live demonstrations, new product, marketing and training presentations were given by Reinhard Schreiner, Sales Manager of TIC, Mark Johnson, President and Valerie Johnson, Marketing Director of Tapmatic Corporation USA. The meeting also included an evening celebration and a trip to Kriessern, Switzerland for a plant tour and continued new product training.

The occasion provided an opportunity for a hands on launch of several new products including:

The RCT *Reduced Cycle Time* tapping is a new self-reversing head for high production CNC jobs that runs faster to cut cycle times even further and is simple and easy to use.

SelectaFlex, the newest addition to Tapmatic's popular SynchroFlex program for rigid tapping offers the same tap life increase of 100% or more and also incorporates a thrust adjustment for difficult to machine materials.

Tapmatic Corporation USA, a third generation, family owned business, will mark another milestone in 2007 as it celebrates its 55th Anniversary.
